

Näktergal Magellan

Up until now, we didn't have a name for our system. We just called it the Näktergal System and our ambition was limited to consumer lending systems in the Nordic region.

Then we went to Web Summit in Lisbon and got overwhelmed by the response. As a result, we are looking at complementing our product offering (stay tuned) and now have global dreams.

To emphasize our global ambitions and give recognition to the country that gave birth to our new direction, we name our first system Näktergal Magellan.

In the 16th century, the Portuguese Ferdinand Magellan achieved a nearly complete circumnavigation of the globe for the first time in history.

Since we presented at Web Summit we are connecting with amazing new customers and partners and are on our way to have our system set up around the world. Thank you, Web Summit, and thank you Portugal!

Näktergal Magellan – transforming banking around the globe

About Näktergal

Näktergal is a Stockholm-based development house building core banking systems that handle *regulatory compliance* and *automates* the workload so banks can focus on marketing & product optimization.

Our first system, *Magellan*, is a *high-performance*, massively *automated* lending system enabling banks to handle superior credit volumes and apply business intelligence to ensure business success.
